A program of St. Charles County CAPS

Interested in Job Shadowing?

Job shadowing is a unique opportunity for students to experience an occupation for a short period of time. Job shadowing involves following a business professional, during a typical workday, to get a closer look at what a particular career field involves. You'll have the opportunity to ask questions to help you decide if the career field is a good fit for your strengths, interests, and career goals.

"It provided a lot of information that I didn't think about when first researching this profession."

- Christopher, Francis Howell HS

"The best part of the job shadow was getting to see many different sides of the career. Not only did I see the nursing side, but I saw the desk work, the radiation process, and many other cool things."

- Alexis, Holt HS

"The person I shadowed asked me for advice on marketing strategies and I was able to provide her some possibilities and she is actually going to use them."

- James, Orchard Farm HS

"Being in the operating room during different procedures opened my eyes to the amount of healthcare jobs available."

- Jonas, Liberty HS

The **Career Explorations Alliance** pairs students with business professionals in our community to provide first-hand information about **job skills** and **careers**.

Why should I job shadow?

- Job shadowing can help you decide on a major or career path.
- You'll experience a typical workday in a career field you find interesting.
- Job shadowing provides you an opportunity to explore interests and have a seasoned professional answer your questions.

What occupations can I job shadow?
